DETAILED ACTION

1. This action is responsive to the application filed on April 25, 2001. Claims 1 – 14 are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or group of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CAR 1.499, applicant is required , in response to this action, to elect a single invention to which the claims must be restricted.

Claims 1 – 10 are drawn to Virtual Task or Management /Control classified in class 718, subclass 100.

Claims 11 – 14 are drawn to data processing, classified in class 717, subclass 140The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2157

Because these inventions are distinct for the reasons given above and the search group required for Group I is not required for group II , restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Thomas .X. Li on 8/19/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to non-elected inventions, the inventorship must be amended in compliance with 37CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under CFR 1.17(i).
